

Soft Close Hinge and Roll Out Tray Installation

Blumotion Soft Close Hinges:

Installation is very simple: Just position the hinges in one of the corners (usually the top side of the door) and screw them into the frame. For more information on the hinges [click here](#).

Roll Out Trays:

Installation is like a regular drawer installation:

- 1) Insert plastic back support brackets from glides into pre drilled holes on back panel. Once aligned, screw into place.
- 2) Slide glides into plastic brackets (they will not go back all the way) and line up glides against frame. Screw glide into frame where desired.
- 3) Insert roll out tray onto glides.
